VILNIUS

10 principles for quality architecture in Vilnius

1. Respect urban context
(or, if needed - make creative changes)

2. Separate public and private spaces

3. Bring life into the streets
(pedestrians over transport)

4. Create contemporary architecture

5. Use natural local building materials

6. Convert and adapt
(better save than destroy)

7. Preserve and reuse the heritage

8. Protect and enhance the greenery of the city

9. Organize architectural competitions

10. Take the priority of the content over the form
